

## **IN THE CLAIMS**

This listing of claims will replace all prior versions, and listings, of claims in the application:

### **Listing of Claims:**

1. (currently amended): A bandage providing a cooling effect to a user, comprising:
  - a. a flexible and leak proof cold pack container having a first end and a second end;
  - b. a first bandage support member ~~permanently~~ integrally attached to the first end of said cold pack container;
  - c. a second bandage support member ~~permanently~~ integrally attached to the second end of said cold pack container;
  - d. at least one chemical agent and at least one solution collectively disposed within said cold pack container, which, when mixed, undergo an endothermic reaction;
  - e. means for separating said agent and said solution within at least one chamber within said cold pack container of said bandage, at least one portion of said separating means being easily broken or ruptured so that said agent and said solution may be mixed;
  - f. a first skin-adhesive portion located on said first bandage support member for affixing the bandage to the body of said user;
  - g. a second skin-adhesive portion located on said second bandage support member for affixing the bandage to the body of said user; and

- h. a sterile portion adapted for contact with the area of the body to be covered by said bandage.
2. (original): A bandage as claimed in claim 1, wherein said sterile portion may be associated with at least one of an antibiotic, an anesthetic, an antipyretic, and a burn medicament.
3. (original): A bandage as claimed in claim 1, wherein said separating means includes one of a frangible, tearable or puncturable member, said chemical agent is provided in dry solid or concentrated solution form, and said solution is water.
